

## Cyber Security Service

# Emergency Incident Response

If your organisation believes it is under a cyber attack, data threat, or a possible information compromise, Intalock can help with our Emergency Incident Response (IR) service.

Intalock Cyber Security Incident Response Team specialists can immediately act when needed most to identify attacks and isolate compromising events, minimising financial and business continuity impacts.

The financial implication of these attacks is significant, with the average cost to organisations reaching close to \$4 million in 2020<sup>1</sup>, and this doesn't include the extensive reputational damage that is caused by successful cyber attacks.

Intalock is one of Australia's leading Managed Security Services Providers (MSSP). For over 10 years, Intalock has specialised in Data and Information services with Security in our DNA.

*Cyber specialists can immediately act when needed most to identify attacks and isolate compromising events*

Incident Response specialists will work with your organisation, in many situations on-site, to identify the nature of the compromise or cyber attack. Investigations will address Ransomware, Malware, Phishing, Data breach, DDoS attack and identify Systems, Platforms, and Endpoints affected.

It's Not If, But When ...

# Prepare Your Organisation to Respond to Cyber-Security Incidents

Intalock's Emergency IR service will help clients to:

Gain a better understanding of what is occurring in their environment

Identify vulnerabilities users are exposed to

Respond to, contain and remediate cyber attacks

Intalock can further scope and implement any accepted recommendations, resulting in an improved security posture and future potential risk mitigation.

When your organisation experiences a cyber attack or suspicious incident, our expert Emergency Cyber Security Incident Response Team is ready to assist with threat detection, containment, and recovery.

## In Case of Emergency...
